### Experience

#### **mojo** - Fullstack Social Media App (Next.js, Prisma, PostgreSQL, Clerk)

- Developed a full-stack social media application using Next.js App Router, Prisma, and PostgreSQL.
- Implemented user authentication and profiles with Clerk, enabling posts with images, likes, comments, and follow relationships.
- Built a modern UI with shadcn/ui and deployed on Vercel, featuring real-time notifications and responsive design.

#### **Expense GQL** (React, GraphQL, Node.js, MongoDB, Tailwind CSS)

- Built a fullstack expense tracker with GraphQL API, user authentication, and dynamic chart visualisation for financial insights

#### **Advanced Auth** (React, Node.js, Express, MongoDB)

- Developed a full-stack authentication system with user registration, login, and JWT-protected routes
- Implemented password reset via email (Mailtrap integration), email verification, and password validation
- Designed a responsive React and Tailwind CSS frontend with error handling, loading states, and a user dashboard

#### **myFlix Movie App** (MERN)

- Developed both the server-side and client-side for a comprehensive movie application
- Built a RESTful API with Node.js, Express, MongoDB, and Mongoose to handle secure user authentication and CRUD operations
- Implemented a responsive React SPA where users can register, log in, save favourite movies, and update their profiles

All projects include live demos and source code at: [github.com/MoJoSchuck](https://github.com/MoJoSchuck)

### Education

**Coding Bootcamp - Career Foundry** // Berlin, Germany - Remote  
Certificate in Full Stack Web Development , February 2024 - August 2024

#### **University of Applied Sciences Aschaffenburg**

- B.Sc. - Media Informatics, October 2015 - March 2020

### Previous Background

Worked several years in customer-oriented sales roles, which strengthened my communication skills and structured work approach

### Skills

React

Next.js

TypeScript

JavaScript

Tailwind CSS

node.js

mongoDB

PostgreSQL

Prisma

GraphQL
